Lecture Short: Duplicated Zodiac Signs and Intercepted Zodiac Signs.

Introduction

If we look for the patterns within Astrology, we have the ability to go deeper in revealing universal symbols for deeper suggestions to our subconsciousness that will allow more expansive awareness to be reflected back to our self-conscious for analysis that can assist our Personality on why we have certain reactions from our accumulated life experiences.

It's important to remember that we are multi-dimensional Beings navigating the surface of dense vibrations that appear motionless, or frozen in time, and we can be perceived as surfers on the waves of consciousness exploring different degrees of a type of lower conscious awareness from a subjective plane of a Higher Intelligence.

In this short video, I will shine light on how Astrologist have took notice and categorized what is called "Duplicated Zodiac Signs" and "Intercepted Zodiac Signs."

With Astrology, we will include Tarot which has more in-depth symbolism and attributions embedded for a more powerful object that our subconscious can wrap meaning around for our subjective understandings.

House Sizes

Some of us incarnate within the Earth plane at certain degrees where an entire Zodiac sign is enclosed at 30 degrees within a larger house ruled by another Zodiac sign.

On the Foundation Layer of astrology, all house sizes are 30 degrees in size, but the Personality Layer can have larger or smaller size houses that can reveal hints about our past incarnations.

This particular astrology chart has an intercepted Sagittarius in the 11th House ruled by Scorpio, and also the intercepted Gemini in the 5th House ruled by Taurus.

From the 1st House to the 6th House is the subjective life of the Personality and will always equal 180 degrees whereas from the 7th House to the 12th House is considered the objective life of the Personality.

Notice the small, balanced, and large houses of this astrology chart, which the small houses reveals difficulties the Personality will experience and we use the 1st, 2nd, 7th, 8th House attributions to help identify with our life experience these difficulties.

When we are further along in life, we can reflect and examine our life experiences and take notice of the emotions registered to know these difficulties which need to be identified in a way where the Personality can transform and overcome for expansion of consciousness.

This will expand and enlarge the smaller houses while also decreases the size of the large houses so that all 12 houses on the Personality layer will attempt to match the equal houses on the Foundation layer which can result in a balanced lifestyle to a degree of freedom within limitations.

Intercepted Signs

The intercepted Gemini, which is 30 degrees enclosed within the 5th House ruler of Taurus of 36 degrees, and with equal degrees, the intercepted Sagittarius enclosed within the 11th House ruler of Scorpio, we can take notice of the captured signs that struggle for expression and balance.

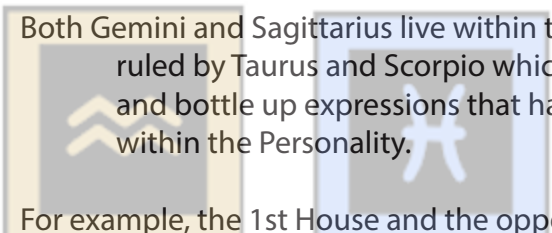

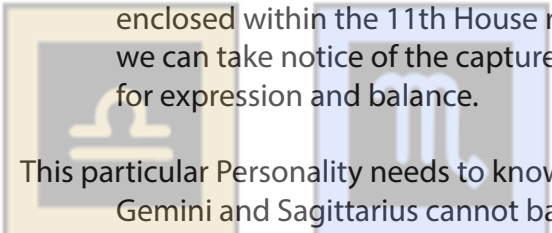

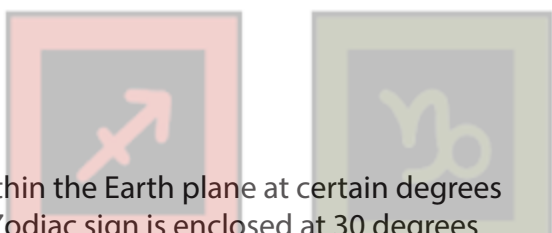

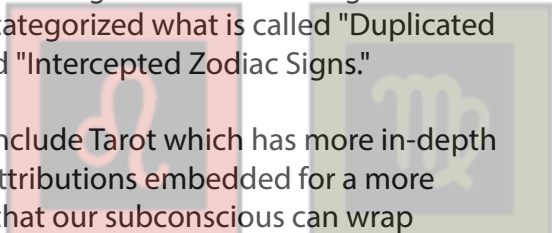

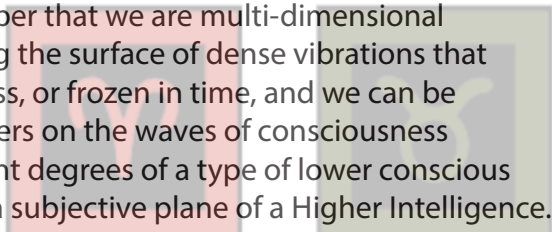

This particular Personality needs to know that their Gemini and Sagittarius cannot balance their particular expressions or work together as a team.

Both Gemini and Sagittarius live within the houses ruled by Taurus and Scorpio which creates repressed and bottle up expressions that have difficulties within the Personality.

For example, the 1st House and the opposite 7th House work together, the 2nd House and 8th House work together, but for intercepted Gemini and Sagittarius, these qualities will have no midpoint for creating balanced expressions because they are blocked from one another.

One of the Gemini qualities is to quickly gather data from the outside world and then Sagittarius will take the details from Gemini, discriminate and separate the data for the Personality to create their organized understandings.

For the intercepted Gemini in a Taurus house, the Personality will gather lots of useless data with no help from Sagittarius to discriminate, whereas Taurus has the tendency to be closed minded and expect solid and tangible data or else it will be rejected.

Duplicated Zodiac Signs Intercepted Zodiac Signs

Duplicated Signs

If intercepted signs exist within an astrology chart, so does duplicated signs to offset the degrees of separation because all astrology charts total in 360 degrees.

Within this astrology chart, the 1st and 2nd houses are ruled by Aquarius and the 7th and 8th houses are ruled by Leo.

The 1st house is 20 degrees and the 2nd house is 25 degrees which totals 45 degrees of Aquarius qualities for both houses.

The same applies to Leo in the 7th and 8th houses.

Aquarius and Leo will have double the work or double the expressions that will cover more territory of this particular Personality and affect more areas in their life.

Duplicated Aquarius and Leo will present stronger aspects which will find ways to get around the difficulties caused by the intercepted Gemini and Sagittarius.

The primary problem with this concept is we all have to identify and overcome our difficulties so that we can expand our awareness and grow our consciousness instead of avoiding our difficulties which will continue to loop around until we take action and integrate them.

This was a quick introduction to intercepted Zodiac signs and duplicated Zodiac signs, which later lectures will further analyze and explain in detail on how we can be more aware of these Zodiac qualities that are present in many astrology charts.

If we can train our mind to become more familiar with Astrology and Tarot symbolism and the attributions within our Astrology chart, then we can identify the contrast in our experiences which will allow spiritual unfoldment to higher degrees of consciousness.
